

The permanent and the shrinkage cannot be separated

weaken them together and the benefit vanishes; force them apart and the agent breaks

linear monotone drift, 8 seeds. Mechanism (live – inert): -0.1 at $\rho=0.05$ ($p=1.000$), $+3.1$ at $\rho=0.15$ ($p=0.130$), -205.6 decoupled ($p=0.010$).
